

ELGIN

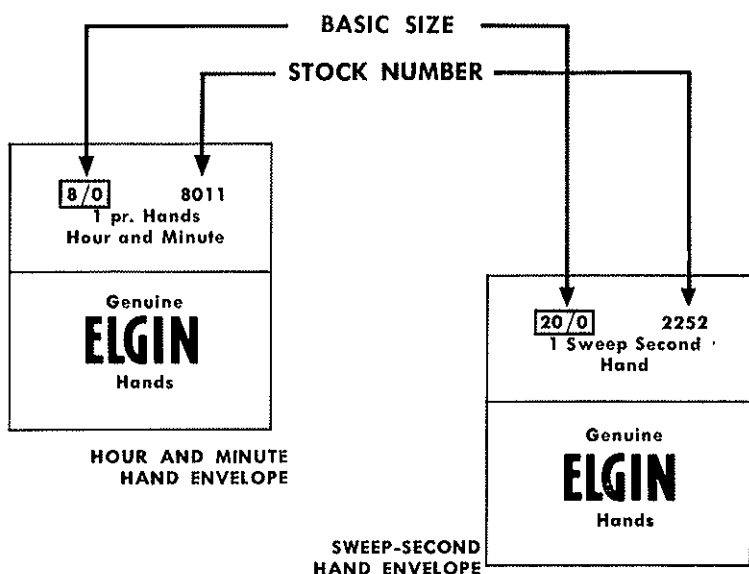

genuine HAND

CHART

This chart of Genuine Elgin Hands has been prepared to assist you, the watchmaker, when it is necessary for you to select order, or replace hands for Elgin Watches. The charts on the following pages list all the necessary information you will require to order Genuine Elgin Hand replacements.

PACKAGING

Genuine Elgin Hands are packaged in factory-sealed envelopes for your protection. Hour and Minute Hands are packaged only in pairs. Second and Sweep-Second Hands are packaged one to a package. It is necessary to locate the proper hands for your requirements in the Hand Chart and then order by Stock No. as indicated in that chart.

HOW TO SELECT AND ORDER GENUINE **ELGIN** HANDS

1. DETERMINE THE LENGTH OF HANDS REQUIRED

Proper length can be determined as follows:

A) If original hands are available use MM ruler to measure the length of the minute hand, sweep-second hand or second hand as required. **IMPORTANT**—be sure to measure length from center of hole to tip of hand. This figure should then be doubled as all hand lengths in the chart are twice the actual length.

B) If original hands are not available use MM ruler to measure the narrowest diameter of the dial from outer edge of minute track to outer edge of minute track on opposite side. (This procedure applies for Hour and Minute Hands and Sweep Second Hands. To determine length of second hand measure diameter of second bit.)

2. DETERMINE MOVEMENT SIZE (i.e.; 8/0, 13/0, 20/0, 16S, etc.).

Movement size can be determined by using a movement gauge, or if grade number is stamped on the plates, use the grade number and refer to the table on Elgin movement sizes in the Elgin Service Manual.

3. REFER TO THE CHART LISTINGS

Select the chart that shows the type of hands desired for the movement size requiring the replacement. The basic grade system of identifying packages containing Elgin hands is used. The movement size shown in bold face is the basic size. All other movement sizes listed in that same grouping are interchangeable and take same hands. After locating proper charts, select color and style of hand desired which is available in the proper length. Order by stock number indicated in the last column of the chart.

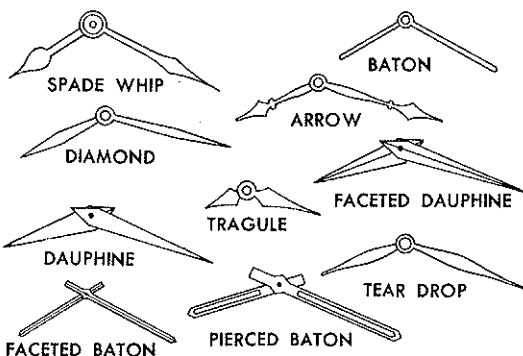

ILLUSTRATED HAND STYLE CHART

HOUR and MINUTE HANDS	 SPADE WHIP  BATON  DIAMOND  ARROW  DAUPHINE  TRAGULE  FACETED BATON  FACETED DAUPHINE  PIERCED BATON  TEAR DROP	DOMESTIC
SECOND HANDS	 BATON (COUNTER BALANCED)  SPEAR (COUNTER BALANCED)  ARROW (COUNTER BALANCED)  BATON  DAUPHINE	
SWEEP SECOND HANDS	 BATON (COUNTER BALANCED)  ARROW  BATON	
HOUR and MINUTE HANDS	 DAUPHINE (LUMINOUS)  FACETED DAUPHINE  TRAGULE	IMPORTED
SECOND HANDS	 BATON (COUNTER BALANCED)  BATON	
SWEEP SECOND HANDS	 ARROW  BATON	

Hands for all popular Elgin imported grades are available and are listed at the end of the chart for domestic grades. Imported hands are listed in the chart by the grade number which is stamped into the plate of each imported Elgin Movement.
