

**Education Committee
2014-2015 Report**

There were a number of classes offered this year at AWCI. Tom has returned to the classroom and has provided the opportunity for the majority of the classes. We would also like to share our appreciation for all those who have presented classes and increased the proficiency of watchmakers and clockmakers out in the field. A new course this year was initiated for cell replacement that will be offered in off-site locations. This course is designed for retail level training. There are also a number of courses that AWCI is offering to bring to areas off site. The courses include:

Balance Staff and Timing

Timing and Adjustments

Quality Control

Quartz Watch Repair and Diagnostics

Mechanical Chronographs

Modern Wristwatch Oiling Procedures

Servicing ETA Quartz Chronographs

New clock course are under development

As you see a need for additional courses please contact the Education chair or AWCI headquarters for feasibility.
