

During the last 6 months the REC has worked to communicate and extend an invitation to each member for participation. There was an invitation to highlight each institution in the *Horological Times* of which many of the institutions have and will participate in. An invitation was also extended to participate at the annual meeting with their students. An invitation to rejoin the REC was sent to Ecole Nationale de l'horlogerie in a Trois-Rivieres in Canada and was accepted. There was also great strides made to review the tech guides for the CW21 Exam.
